

Kundan Vyas

DevOps Engineer

kundanvyas197@gmail.com | +91-9351582228 | linkedin.com/in/kundan-vyas | github.com/Kundan547

PROFILE SUMMARY

DevOps Engineer specializing in Kubernetes, GitOps, CI/CD automation, and multi-cloud infrastructure on AWS and Azure. Delivered measurable impact including 50% cost reduction via KEDA autoscaling, SOC 2 Type II compliance, and full Jenkins-to-ArgoCD migration across Dev, QA, Stage, and Production. Proven ability to own infrastructure end-to-end, resolve critical production issues independently, and drive automation at scale.

PROFESSIONAL EXPERIENCE

Self-Employed | DevOps Engineer & Cloud Instructor

Aug 2023 – May 2025

- Designed and delivered **end-to-end DevOps solutions** for multiple clients — Kubernetes clusters, CI/CD pipelines, and cloud provisioning on **AWS and Azure** — while independently conducting **AWS and Azure cloud training**, covering fundamentals to production-level infrastructure management.

47Billion | DevOps Engineer

Sep 2025 – Present

- Implemented **KEDA event-driven autoscaling** on Azure Kubernetes clusters, reducing infrastructure costs by **50%** through right-sized, demand-driven resource scaling.
- Led **SOC 2 Type II compliance** initiative (2026), coordinating infrastructure security controls, access management, audit evidence collection, and logging configurations to meet certification requirements.
- Migrated entire **Dev, QA, Stage, and Production** Jenkins CI/CD pipelines to **ArgoCD GitOps** model using ApplicationSets and Helm, eliminating manual deployments, reducing environment drift, and standardizing all environment promotions.
- Configured **Ory authentication** with **GitHub integration** and **Jenkins pipeline** enforcement — all access rule changes managed exclusively through GitHub for full auditability and GitOps compliance.
- Provisioned complete **Kubernetes infrastructure** from scratch including cluster setup, networking, and Helm chart customization; built **Jenkins CI/CD pipelines** achieving **40% reduction in deployment time**.
- Migrated cluster management from **Rancher to Kubernetes Dashboard**, reclaiming **1.5 CPU cores** per node and improving service performance and Kubernetes ENI availability.
- Building **Terraform + GitHub pipeline** for fully declarative infra management — all changes via PR, serving as a **Disaster Recovery** mechanism to re-provision any environment from GitHub on regional failure.
- Designed and built **Claude AI-powered agents** for automated generation of Terraform configs, Helm charts, Argo Workflows, and Jenkins pipelines — standardizing DevOps workflows org-wide.

47Billion | DevOps Engineer Intern

Jun 2025 – Aug 2025

- Contributed to **production infrastructure** across multiple client environments, handling live deployments and operational changes end-to-end.
- Resolved org-wide **Bitnami deprecation crisis** — Bitnami abruptly migrated all Docker images to a new registry and deprecated managed Helm charts (PostgreSQL, MSSQL, MongoDB, RabbitMQ), impacting multiple production environments; wrote an automated **shell script** to scan clusters, pull and retag all affected images under the org registry, and deployed a self-hosted **Nexus repository** to permanently store and version-control all Helm chart tarballs — restoring full deployment stability with zero manual image hunting.
- Engineered **custom Helm charts** for StatefulSets (PostgreSQL, MSSQL, MongoDB, RabbitMQ) and reusable **Deployment/Service templates**, fully parameterized via values.yaml — enabling one-file re-deployment to any cluster or environment with no chart modifications required.

TECHNICAL SKILLS

Container Orchestration: Kubernetes, Docker, Helm, KEDA, ArgoCD, Argo Workflows, Kubernetes Dashboard

CI/CD & GitOps: ArgoCD, Jenkins, Argo Workflows, GitHub Actions, Webhooks

Infrastructure as Code: Terraform, Ansible, Helm Charts

Cloud Platforms: AWS (EC2, CodeBuild, CodeDeploy, CodePipeline), Azure (AKS, VMs, Azure DevOps), On-Premise Kubernetes

Monitoring & Observability: Prometheus, Grafana, Loki, PagerDuty

Authentication & Security: Ory (Kratos, Hydra), SOC 2, TLS, Secret Management, Azure Key Vault, HashiCorp Vault

Programming & Scripting: Python, Bash, Shell Scripting, Linux

Databases: MySQL, PostgreSQL, MongoDB, DynamoDB, RDS

Core Competencies: Troubleshooting, Incident Response, Production Support, Infrastructure Automation

EDUCATION

B.Tech in Information Technology

Aug 2021 – 2025

Medicaps University, Indore, India | CGPA: 7.14

Govt. Senior Secondary High School

Jan 2021

Science – Mathematics | Rajasthan | 91%
