Kundan Vyas

DevOps Engineer | Kubernetes · GitOps · Cloud Infrastructure Automation

kundanvyas197@gmail.com | +91-9351582228 | linkedin.com/in/kundan-vyas | github.com/Kundan547

PROFILE SUMMARY

DevOps Engineer specializing in Kubernetes cluster architecture, GitOps delivery pipelines, and Infrastructure-as-Code across AWS and Azure.

Comfortable owning production infrastructure end-to-end — from cluster provisioning and CI/CD design to incident response and compliance — with a track record of resolving critical issues independently under pressure.

Constantly exploring new tools and building AI-assisted automation — from Claude-powered DevOps agents to MCP servers for self-healing infrastructure.

PROFESSIONAL EXPERIENCE

DevOps Engineer — *47Billion* *Sep 2025 – Present*

(Promoted from Intern below)

- **Cut infrastructure costs 59%** by architecting KEDA event-driven autoscaling on Azure Kubernetes (AKS), replacing static replica counts with demand-driven, metrics-based scaling policies.
- **Migrated Jenkins → ArgoCD GitOps** using ApplicationSets and parameterized Helm charts across Dev, QA, Stage, and Production — eliminated manual deploys, environment drift, and config divergence.
- **Led SOC 2 Type II compliance (2026)** — implemented RBAC access controls, centralized audit logging, and evidence-collection pipelines across the Kubernetes and cloud stack.
- **Reduced deployment time 40%** by provisioning Kubernetes clusters from scratch — networking, ingress, and Helm chart customization — and building Jenkins CI/CD pipelines.
- **Reclaimed 1.5 CPU cores/node** and improved ENI availability by migrating cluster management tooling from Rancher to the native Kubernetes Dashboard.
- Configured Ory (Kratos/Hydra) IAM with GitHub-enforced policy changes — every access-rule modification version-controlled and auditable via PR.
- Building a Terraform + GitHub CI pipeline for declarative, PR-gated provisioning — doubles as disaster-recovery for regional failover.
- Designed Claude AI agents to auto-generate Terraform, Helm, Argo Workflows, and Jenkinsfiles — standardizing DevOps tooling org-wide.
- **Cut production release time to under 5 minutes** by migrating fleet-wide Rancher deployments to ArgoCD across 3 independent production clusters, each releasing separately.
- **Built multiple MCP servers** for routine ops — automated monitoring and cluster sanity checks that detect and remediate issues within scoped, least-privilege permissions.

DevOps Engineer Intern — *47Billion* *Jun 2025 – Aug 2025*

- **Resolved an org-wide Bitnami registry crisis** affecting production: automated an image-retag script across clusters and deployed a self-hosted Nexus repo to version-control Helm chart tarballs — zero manual image hunting, full stability restored.
- Engineered parameterized Helm charts for StatefulSets (PostgreSQL, MSSQL, MongoDB, RabbitMQ) and reusable Deployment/Service templates via values.yaml — one-file redeployment to any cluster.

DevOps Engineer & Cloud Instructor — *Self-Employed* *Aug 2023 – May 2025*

- Delivered end-to-end DevOps solutions for multiple clients — Kubernetes, CI/CD, and AWS/Azure provisioning.
- Independently trained clients in AWS and Azure, from fundamentals through production-grade infrastructure.

TECHNICAL SKILLS

Container Orchestration: Kubernetes (RBAC, Networking, StatefulSets, Ingress), Docker, Helm, KEDA

CI/CD & GitOps: ArgoCD (ApplicationSets), Argo Workflows, Jenkins, GitHub Actions, GitLab CI/CD, Webhooks

Infrastructure as Code: Terraform (modules, remote state), Ansible, Helm Charts (values.yaml templating)

Cloud Platforms: AWS (EC2, CodeBuild, CodeDeploy, CodePipeline), Azure (AKS, VMs, Azure DevOps), On-Prem K8s, K3s

Monitoring & Observability: Prometheus, Grafana, Loki, PagerDuty

Security & Identity: Ory (Kratos, Hydra), SOC 2 Type II, TLS, HashiCorp Vault, Azure Key Vault, Secret Management

Languages & Databases: Python, Bash/Shell Scripting, Linux, MySQL, PostgreSQL, MongoDB, DynamoDB

EDUCATION

B.Tech, Information Technology — Medicaps University, Indore (CGPA 7.14) *2021 – 2025*

Senior Secondary (Science-Mathematics) — Rajasthan (91%) *2021*
